Paper 1

October/November 2020

MARK SCHEME

Maximum Mark: 75

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2020 series for most Cambridge IGCSE™, Cambridge International A and AS Level and Cambridge Pre-U components, and some Cambridge O Level components.

This document consists of **13** printed pages.

PUBLISHED**Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Question	Answer	Marks																											
1(a)	Any one from: – Hypertext Mark-up Language – Web authoring language // language used to write/create websites/web pages	1																											
1(b)(i)	– Presentation	1																											
1(b)(ii)	One mark per each nibble: <table border="1" data-bbox="398 488 1003 683"> <tbody> <tr> <td data-bbox="398 488 472 552">43</td> <td data-bbox="472 488 546 552">0</td> <td data-bbox="546 488 620 552">1</td> <td data-bbox="620 488 694 552">0</td> <td data-bbox="694 488 768 552">0</td> <td data-bbox="768 488 842 552">0</td> <td data-bbox="842 488 916 552">0</td> <td data-bbox="916 488 990 552">1</td> <td data-bbox="990 488 1064 552">1</td> </tr> <tr> <td data-bbox="398 552 472 616">B7</td> <td data-bbox="472 552 546 616">1</td> <td data-bbox="546 552 620 616">0</td> <td data-bbox="620 552 694 616">1</td> <td data-bbox="694 552 768 616">1</td> <td data-bbox="768 552 842 616">0</td> <td data-bbox="842 552 916 616">1</td> <td data-bbox="916 552 990 616">1</td> <td data-bbox="990 552 1064 616">1</td> </tr> <tr> <td data-bbox="398 616 472 683">F0</td> <td data-bbox="472 616 546 683">1</td> <td data-bbox="546 616 620 683">1</td> <td data-bbox="620 616 694 683">1</td> <td data-bbox="694 616 768 683">1</td> <td data-bbox="768 616 842 683">0</td> <td data-bbox="842 616 916 683">0</td> <td data-bbox="916 616 990 683">0</td> <td data-bbox="990 616 1064 683">0</td> </tr> </tbody> </table>	43	0	1	0	0	0	0	1	1	B7	1	0	1	1	0	1	1	1	F0	1	1	1	1	0	0	0	0	6

Has the largest storage capacity	✓																															
Can be dual layer	✓		✓																													
Read using a red laser		✓	✓																													
Has the smallest storage capacity		✓																														
Stores data in a spiral track	✓	✓	✓																													

Question	Answer	Marks
4(a)	<p>One mark for each correct logic gate with correct input:</p>  <p>The diagram shows a logic circuit with three inputs: A, B, and C. Input A is connected to the top input of a NAND gate. Input B is connected to the top input of a second NAND gate. Input C is connected to the bottom input of the second NAND gate. The outputs of both NAND gates are connected to the inputs of a third NAND gate. The output of this third NAND gate is connected to the top input of a final OR gate. Input C is also connected to the bottom input of this final OR gate. The output of the final OR gate is labeled X.</p>	4

Question	Answer	Marks																																													
4(b)	<p> Four marks for 8 correct outputs Three marks for 6/7 correct outputs Two marks for 4/5 correct outputs One mark for 2/3 correct outputs </p> <table border="1" data-bbox="338 384 1317 975"> <thead> <tr> <th data-bbox="338 384 416 448">A</th> <th data-bbox="416 384 495 448">B</th> <th data-bbox="495 384 573 448">C</th> <th data-bbox="573 384 1240 448">Working space</th> <th data-bbox="1240 384 1317 448">X</th> </tr> </thead> <tbody> <tr> <td>0</td> <td>0</td> <td>0</td> <td></td> <td>0</td> </tr> <tr> <td>0</td> <td>0</td> <td>1</td> <td></td> <td>1</td> </tr> <tr> <td>0</td> <td>1</td> <td>0</td> <td></td> <td>0</td> </tr> <tr> <td>0</td> <td>1</td> <td>1</td> <td></td> <td>1</td> </tr> <tr> <td>1</td> <td>0</td> <td>0</td> <td></td> <td>0</td> </tr> <tr> <td>1</td> <td>0</td> <td>1</td> <td></td> <td>1</td> </tr> <tr> <td>1</td> <td>1</td> <td>0</td> <td></td> <td>1</td> </tr> <tr> <td>1</td> <td>1</td> <td>1</td> <td></td> <td>1</td> </tr> </tbody> </table>	A	B	C	Working space	X	0	0	0		0	0	0	1		1	0	1	0		0	0	1	1		1	1	0	0		0	1	0	1		1	1	1	0		1	1	1	1		1	4
