Paper 4 Business Strategy

**October/November 2023**

MARK SCHEME

Maximum Mark: Please Specify

---

**Published**

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2023 series for most Cambridge IGCSE, Cambridge International A and AS Level components, and some Cambridge O Level components.

**PUBLISHED****Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

**GENERIC MARKING PRINCIPLE 1:**

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

**GENERIC MARKING PRINCIPLE 2:**

Marks awarded are always **whole marks** (not half marks, or other fractions).

**GENERIC MARKING PRINCIPLE 3:**

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

**GENERIC MARKING PRINCIPLE 4:**

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

**GENERIC MARKING PRINCIPLE 5:**

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

**GENERIC MARKING PRINCIPLE 6:**

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

**Social Science-Specific Marking Principles  
(for point-based marking)****1 Components using point-based marking:**

- Point marking is often used to reward knowledge, understanding and application of skills. We give credit where the candidate's answer shows relevant knowledge, understanding and application of skills in answering the question. We do not give credit where the answer shows confusion.

From this it follows that we:

- a** DO credit answers which are worded differently from the mark scheme if they clearly convey the same meaning (unless the mark scheme requires a specific term)
- b** DO credit alternative answers/examples which are not written in the mark scheme if they are correct
- c** DO credit answers where candidates give more than one correct answer in one prompt/numbered/scaffolded space where extended writing is required rather than list-type answers. For example, questions that require *n* reasons (e.g. State two reasons ...).
- d** DO NOT credit answers simply for using a 'key term' unless that is all that is required. (Check for evidence it is understood and not used wrongly.)
- e** DO NOT credit answers which are obviously self-contradicting or trying to cover all possibilities
- f** DO NOT give further credit for what is effectively repetition of a correct point already credited unless the language itself is being tested. This applies equally to 'mirror statements' (i.e. polluted/not polluted).
- g** DO NOT require spellings to be correct, unless this is part of the test. However spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. Corrasion/Corrosion)

**PUBLISHED****2 Presentation of mark scheme:**

- Slashes (/) or the word 'or' separate alternative ways of making the same point.
- Semi colons (;) bullet points (•) or figures in brackets (1) separate different points.
- Content in the answer column in brackets is for examiner information/context to clarify the marking but is not required to earn the mark (except Accounting syllabuses where they indicate negative numbers).

**3 Calculation questions:**

- The mark scheme will show the steps in the most likely correct method(s), the mark for each step, the correct answer(s) and the mark for each answer
- If working/explanation is considered essential for full credit, this will be indicated in the question paper and in the mark scheme. In all other instances, the correct answer to a calculation should be given full credit, even if no supporting working is shown.
- Where the candidate uses a valid method which is not covered by the mark scheme, award equivalent marks for reaching equivalent stages.
- Where an answer makes use of a candidate's own incorrect figure from previous working, the 'own figure rule' applies: full marks will be given if a correct and complete method is used. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.

**4 Annotation:**

- For point marking, ticks can be used to indicate correct answers and crosses can be used to indicate wrong answers. There is no direct relationship between ticks and marks. Ticks have no defined meaning for levels of response marking.
- For levels of response marking, the level awarded should be annotated on the script.
- Other annotations will be used by examiners as agreed during standardisation, and the meaning will be understood by all examiners who marked that paper.

**Guidance on using levels-based marking**

Marking of work should be positive, rewarding achievement where possible, but clearly differentiating across the whole range of marks, where appropriate.

The examiner should look at the work and then make a judgement about which level statement is the best fit. In practice, work does not always match one level statement precisely so a judgement may need to be made between two or more level statements.

Once a best-fit level statement has been identified, use the following guidance to decide on a specific mark:

- If the candidate's work **convincingly** meets the level statement, award the highest mark.
- If the candidate's work **adequately** meets the level statement, award the most appropriate mark in the middle of the range.
- If the candidate's work **just** meets the level statement, award the lowest mark.
- L1, L2, etc. must be clearly annotated on the response at the point where the level is achieved.

**Assessment objectives****AO1 Knowledge and understanding**

Demonstrate knowledge and understanding of business concepts, terms and theories.

**AO2 Application**

Apply knowledge and understanding of business concepts, terms and theories to problems and issues in a variety of familiar and unfamiliar business situations and contexts.

**AO3 Analysis**

Analyse business problems, issues and situations by:

- using appropriate methods and techniques to make sense of qualitative and quantitative business information
- searching for causes, impact and consequences
- distinguishing between factual evidence and opinion or value judgement
- drawing valid inferences and making valid generalisations.

**AO4 Evaluation**

Evaluate evidence in order to make reasoned judgements, present substantiated conclusions and, where appropriate, make recommendations for action and implementation.

**NR or 0**

0 (zero) marks or NR (no response):

- Award NR if there is nothing at all written in answer to that question (often the case for optional questions).
- Award NR if there is a comment which is not an attempt at the question (e.g. 'can't do it' or 'don't know', etc.)
- Award NR if there is a symbol which is not an attempt at the question, such as a dash or question mark.
- Award 0 (zero) if there is any attempt at the question which does not score marks. This includes copying the question onto an Answer Booklet.

| Question | Answer  | Marks |
|----------|---|-------|
| 2        | <p>Analysis of the usefulness of other approaches may include:</p> <ul style="list-style-type: none"> <li>• Scenario planning could allow Jane to analyse markets and consider uncertainties in each market. It could be especially useful in finding a diversified market for FL to enter. However, Jane may not know enough about new markets to plan a scenario.</li> <li>• SWOT analysis to understand the internal strengths and weaknesses of FL. Use the strengths to overcome future threats and the opportunities to overcome present weaknesses. Jane may have an excellent understanding of FL, so she may be able to develop the strengths and overcome the weaknesses. However, with the market and product being new (diversification) she may not have enough data to understand the threats and opportunities.</li> <li>• PEST analysis will be useful to understand the external environment of a new potential market. FL currently operates in an international (global) market, so may already have a good understanding of these external influences. However, these influences may not be as applicable to a new market/product.</li> <li>• Porter's five forces may help Jane to develop an understanding of the forces in a new market. It will require an investment in market research to understand the competitive nature of each market. Jane can use the five forces to find market(s) where FL can have a competitive advantage and may have a low intensity of rivalry.</li> <li>• Jane is likely to understand the core competencies of FL. However, how useful will core competencies be for a diversified strategy? Many of FL's core competencies are likely to be transferable (such as administration, marketing, etc.), however they are in a dynamic and specific environment and depending on what market(s) they diversify into.</li> <li>• Ansoff matrix may help Jane to categorise different strategies and ignore ones which do not fit into the diversification quadrant. Ansoff suggests that diversification is the riskiest strategy, and it may help Jane to understand the elements needed for a successful strategy. However, the board has already asked for a diversification strategy, so may not be as useful as some other approaches.</li> <li>• Force field analysis could help Jane to understand the constraining and driving forces that FL could face in a diversification strategy. This may help Jane to identify actions that need to be taken to reduce constraining forces. However, Jane may not have enough data and experience to do a force field analysis, especially in a new market – could require market research.</li> <li>• Decision trees are unlikely to be helpful in developing a diversification strategy, but they could be used to help decide between alternative strategies. Jane may find it difficult to obtain the data on probabilities and economic outcomes to construct a decision tree.</li> </ul> |       |

| <b>No credit<br/>(no analysis on FL)</b>  | <b>L1 <span style="border: 1px solid red; padding: 0 2px;">A1</span> (limited analysis)</b>   | <b>L2 <span style="border: 1px solid red; padding: 0 2px;">A2</span> (developed analysis)</b>   | <b>L3 <span style="border: 1px solid red; padding: 0 2px;">A3</span> (developed analysis of strategy)</b>   |  |       |
| Blue ocean strategy will allow FL to focus on markets which have greatest potential.        | Blue ocean strategy will allow FL to focus on markets which have greatest potential to sell innovative products to the public.                            | Blue ocean strategy will allow FL to focus on markets which have greatest potential to sell innovative products to the public, thereby increasing the profits of FL.  | Blue ocean strategy will allow FL to focus on markets which have greatest potential to sell innovative products to the public, thereby increasing the profits of FL. However, FL has already achieved significant growth by focussing on its core products and a new blue ocean strategy may mean that they lose their competitive edge in this market.       |  |       |
| Assuming that the online fashion market is now a red ocean market, blue ocean will help FL. | Assuming that the online fashion market is now a red ocean market, blue ocean will help FL find a market with untapped customers to increase its revenue. | Assuming that the online fashion market is now a red ocean market, blue ocean will help FL find a market with untapped customers to increase its revenue and future profits.  | Assuming that the online fashion market is now a red ocean market, blue ocean will help FL find a market with untapped customers to increase its revenue and future profits. But if this market is not red ocean, then FL might be better to stick to what it knows and increase its market share further to gain higher profit.                              |  |       |
| SWOT could be used to focus FL on overcoming its threats by using its strengths.            | SWOT could be used to focus FL on overcoming its threats by using its weaknesses, for example by increasing production in the low-cost factories.         | SWOT could be used to focus FL on overcoming its threats by using its weaknesses, for example by increasing production in the low-cost factories, which may enable FL to compete against the established retailers. | SWOT could be used to focus FL on overcoming its threats by using its weaknesses, for example by increasing production in the low-cost factories, which may enable FL to compete against the established retailers. However, the SWOT lacks the detail needed to diversify into a new market, and therefore may provide weak information for decision making. |  |       |
