1 Read Source A in the insert.

(a) Calculate the values of the following **at cost**:

inventory of finished goods at 1 July 2022

.....

cost of production

.....

inventory of finished goods at 30 June 2023.

.....

[3]

Additional information

After preparation of the draft statement of profit or loss the following items were discovered.

- 1 Administrative expenses included \$12 000 of costs which actually related to the factory.
- 2 During June 2023 goods were sent to a customer on a sale or return basis. The goods had a selling price of \$3000 and a cost of \$1400 before factory profit. These had been treated as having been sold in the draft statement of profit or loss although by the year end the customer had not declared an intention to buy the goods.
- 3 A delivery van had a carrying value of \$17 000. A review on 30 June 2023 showed that it had a fair value of \$12 500 and a value in use of \$13 000. No adjustment had been made as a result of this review.
- 4 The company was facing legal proceedings in July 2023. The company's lawyer had advised that the company had a 35% chance of having to pay a fine of \$8000.

(b) Prepare a corrected statement of profit or loss for the year ended 30 June 2023.
