

Worksheet 5: Who might be affected?

For each of the following business actions, identify which stakeholders might be affected by adding to the mind-map. The first stakeholder has been added for you.

1 A business is planning to automate its factory.

The owners – may make the business more efficient, leading to lower costs and higher profitability.

2 A business starts to use Just in Time production.

The local community – more lorries delivering supplies – more noise and pollution.

3 A business is operating in a country with high inflation.

The workers – may expect higher wages and regular pay increases – may be demotivated if their real wage does not keep up with inflation.

4 A business is operating in a country with high inflation.

The owners – will gain limited liability meaning that their personal possessions are no longer at risk.
