

Cambridge International AS & A Level

BUSINESS		9609/2
Paper 2 Business Concepts 2		October/November 2024
MARK SCHEME		
Maximum Mark: 60		
	Published	

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2024 series for most Cambridge IGCSE, Cambridge International A and AS Level components, and some Cambridge O Level components.

PUBLISHED

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptions for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always whole marks (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond
 the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Social Science-Specific Marking Principles (for point-based marking)

1 Components using point-based marking:

 Point marking is often used to reward knowledge, understanding and application of skills. We give credit where the candidate's answer shows relevant knowledge, understanding and application of skills in answering the question. We do not give credit where the answer shows confusion.

From this it follows that we:

- **a** DO credit answers which are worded differently from the mark scheme if they clearly convey the same meaning (unless the mark scheme requires a specific term)
- **b** DO credit alternative answers/examples which are not written in the mark scheme if they are correct
- **c** DO credit answers where candidates give more than one correct answer in one prompt/numbered/scaffolded space where extended writing is required rather than list-type answers. For example, questions that require *n* reasons (e.g. State two reasons ...).
- d DO NOT credit answers simply for using a 'key term' unless that is all that is required. (Check for evidence it is understood and not used wrongly.)
- e DO NOT credit answers which are obviously self-contradicting or trying to cover all possibilities
- f DO NOT give further credit for what is effectively repetition of a correct point already credited unless the language itself is being tested. This applies equally to 'mirror statements' (i.e. polluted/not polluted).
- **g** DO NOT require spellings to be correct, unless this is part of the test. However spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. Corrasion/Corrosion).

2 Presentation of mark scheme:

- Slashes (/) or the word 'or' separate alternative ways of making the same point.
- Semi colons (;) bullet points (•) or figures in brackets (1) separate different points.
- Content in the answer column in brackets is for examiner information/context to clarify the marking but is not required to earn the mark (except Accounting syllabuses where they indicate negative numbers).

3 Calculation questions:

- The mark scheme will show the steps in the most likely correct method(s), the mark for each step, the correct answer(s) and the mark for each answer
- If working/explanation is considered essential for full credit, this will be indicated in the question paper and in the mark scheme. In all other instances, the correct answer to a calculation should be given full credit, even if no supporting working is shown.
- Where the candidate uses a valid method which is not covered by the mark scheme, award equivalent marks for reaching equivalent stages.
- Where an answer makes use of a candidate's own incorrect figure from previous working, the 'own figure rule' applies: full marks will be
 given if a correct and complete method is used. Further guidance will be included in the mark scheme where necessary and any
 exceptions to this general principle will be noted.

4 Annotation:

- For point marking, ticks can be used to indicate correct answers and crosses can be used to indicate wrong answers. There is no direct relationship between ticks and marks. Ticks have no defined meaning for levels of response marking.
- For levels of response marking, the level awarded should be annotated on the script.
- Other annotations will be used by examiners as agreed during standardisation, and the meaning will be understood by all examiners who marked that paper.

Subject Specific Marking Principles for point-based marking

1 Using point-based marking:

Point marking is often used to reward knowledge, understanding and application of skills. We give credit where the candidate's answer shows relevant knowledge, understanding and application of skills in answering the question. We do not give credit where the answer shows confusion. From this it follows that we:

- DO credit answers which are worded differently from the mark scheme if they clearly convey the same meaning, unless the mark scheme requires a specific term.
- DO credit alternative answers/examples which are not in the mark scheme if they are correct.
- DO credit answers where candidates give more than one correct answer where extended writing is required rather than short/list-type answers.
- DO NOT credit answers simply for using a key term unless that is all that is required. (Check for evidence it is clearly understood and used correctly.)
- DO NOT credit answers which are obviously self-contradicting or trying to cover all possibilities. For questions that require *n* reasons, e.g. State two reasons..., mark only the first two answers given, not any two that are correct out of a longer list.
- DO NOT give further credit for what is effectively repetition of a correct point already credited or to 'mirror' statements. For example, a response that includes: 'A business owner would benefit from limited liability as it would protect their personal possessions.' and 'If a business owner did not have limited liability they could lose everything.', cannot both be rewarded in answer to one question.
- DO NOT require spellings to be correct, it is <u>not</u> part of the test. However, spellings of business terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused, e.g. offshore/outsource or effective/efficient.

2 Presentation of mark scheme:

- Questions are in bold text.
- Possible responses are in normal text in a bulleted list.
- Marks are rewarded based on the table provided for each question.
- Possible responses are listed under the appropriate Assessment Objective.
- Slashes (/) separate alternative ways of making the same point.
- Content in the answer column in brackets is for examiner information/context to clarify the marking but is not required to earn the mark.

4 Annotation:

- Every response must have a minimum of one annotation.
- For point marking, ticks can be used to indicate correct answers and crosses can be used to indicate wrong answers.
- For questions where only AO1 and AO2 are rewarded, there is a direct relationship between ticks and marks.
- For levels of response marking, the first time level 1 is achieved, L1 is annotated on the response. If/when level 2 is achieved, L2 should be used, etc.
- Other annotations will be used by examiners as agreed during standardisation, and the meaning will be understood by all examiners who mark that paper.

Guidance on using levels-based marking

Marking of work should be positive, rewarding achievement where possible, but clearly differentiating across the whole range of marks, where appropriate.

The examiner should look at the work and then make a judgement about which level statement is the best fit. In practice, work does not always match one level statement precisely so a judgement may need to be made between two or more level statements.

Once a best-fit level statement has been identified, use the following guidance to decide on a specific mark:

- If the candidate's work **convincingly** meets the level statement, award the highest mark.
- If the candidate's work adequately meets the level statement, award the most appropriate mark in the middle of the range.
- If the candidate's work just meets the level statement, award the lowest mark.
- L1, L2 etc. must be clearly annotated on the response at the point where the level is achieved.

Assessment objectives

AO1 Knowledge and understanding

Demonstrate knowledge and understanding of business concepts, terms and theories.

AO2 Application

Apply knowledge and understanding of business concepts, terms and theories to problems and issues in a variety of familiar and unfamiliar business situations and contexts.

AO3 Analysis

Analyse business problems, issues and situations by:

- using appropriate methods and techniques to make sense of qualitative and quantitative business information
- searching for causes, impact and consequences
- distinguishing between factual evidence and opinion or value judgement
- drawing valid inferences and making valid generalisations.

AO4 Evaluation

Evaluate evidence in order to make reasoned judgements, present substantiated conclusions and, where appropriate, make recommendations for action and implementation.

Annotations for RM Assessor

To award	Annotation	<u>Comment</u>	<u>Use on Paper 2</u>
Correct	>	For objective points that are right or wrong.	Q1(a)(i) and Q2(a)(i) (identify) Q1(b)(i) and Q2(b)(i) (calculate)
Incorrect	×	For objective points that are wrong.	Q1(a)(i) and Q2(a)(i) (identify) Q1(b)(i) and Q2(b)(i) (calculate) Also, incorrect elements of ANY question.
Unclear	?	When there is a misunderstanding in a response.	Any
Too Vague	TV	When the candidate has attempted something, but the mark/skill has not been awarded.	Any
Highlight	Highlighter Or Underline	To highlight a point or section of an answer that justifies the mark/annotation.	Any
Benefit of doubt	BOD	When the candidate has attempted something, and the mark/skill has been awarded.	Any
On page comment	On page comment	Rarely used in live marking. Very useful for practice scripts. To communicate with the supervisor.	Any
Not using text	NUT	When the context has not been used.	Q1(b)(ii), Q1(c), Q1(d), Q2(b)(ii), Q2(c), Q2(d)
Seen	SEEN	To show a page/section has been seen/read.	Any
Not answering question	NAQ	When the response is not focused on answering the question.	Any

To award	Annotation	<u>Comment</u>	Use on Paper 2
Repetition	REP	The repetition of a previous point in a response Or Candidate is copying the case study/data.	Any
Own figure rule	OFR	The own figure rule applies – acts as a mark/tick.	Q1(b)(i) and Q2(b)(i)
Knowledge (AO1) L1	K	When AO1 has been awarded. Number of Ks should match the mark awarded.	Q1(a)(ii), Q1(b)(ii), Q1(c), Q1(d), Q2(a)(ii), Q2(b)(ii), Q2(c), Q2(d)
Knowledge (AO1) L2			
Application (AO2) L1	APP	When AO2 has been awarded. Number of APPs should match the mark awarded.	Q1(a)(ii), Q1(b)(ii), Q1(c), Q1(d), Q2(a)(ii), Q2(b)(ii), Q2(c), Q2(d)
Application (AO2) L2			
Analysis (AO3) L1	AN	When AO3 at Level 1 has been awarded.	Q1(c), Q1(d), Q2(c), Q2(d)
Analysis (AO3) L2	DEV	When AO3 at Level 2 has been awarded.	Q1(c), Q1(d), Q2(c), Q2(d)
Evaluation (AO4) L1	EVAL	When AO4 at Level 1 has been awarded.	Q1(d) and Q2(d)
Evaluation (AO4) L2	E	When AO4 at Level 2 has been awarded.	Q1(d) and Q2(d)
Evaluation (AO4) L3	EE	When AO4 at Level 3 has been awarded.	Q1(d) and Q2(d)

Question	Answer	Marks
1(a)(i)	Identify one feature of the primary sector.	1
	Indicative content	
	 Any feature of the primary sector ✓, including: extraction/collection of natural resources/raw materials sell raw materials to the secondary sector a primary sector industry such as farming, fishing, mining Accept all valid responses.	

Question		Answer	Marks
1(a)(ii)	Explain the term intrapreneur.		3
	AO1 Knowledge and understanding 1 mark	AO2 Application 2 marks	
		2 marks Developed application of one relevant point to a business context.	
	1 mark Knowledge of one relevant point is used to answer the question.	1 mark Limited application of one relevant point to a business context.	
	0 marks No creditable response.	0 marks No creditable response.	
	Indicative content AO1 Knowledge and understanding Knowledge of intrapreneur , may include: • manager who leads a team • develop ideas/technologies/applications • creative/innovative		
	Note: without K cannot award any marks.		
	AO2 Application Explanation of intrapreneur may include: employee within a business product development to help improve the company/profits to help meet the demand of consumers creates a competitive advantage		

Question			Ans	swer		Marks
1(a)(ii)	Context applied to intrapreneur, including: risks stay with the business takes on an entrepreneurial role within a business has the characteristics (of) an entrepreneur specific examples from FE, such as Lin developing new products specific examples from BL, such as location of the factory Guidance in awarding marks

Question	Answer	Marks
2(c)	 to enable business to launch new products to enable business to avoid dogs 	
	Knowledge of a disadvantage of the Boston matrix analysis 🗷 (max 1 mark- annotate on right), including:	
	 withdrawal of dogs from the market unlikely to increase revenue to move ? to stars will need more spending on marketing 	
	 to move stars to cash cows will also require more spending/increased costs 	
	sudden changes in demand may not be accounted for	
	does not consider contribution to total revenue/profit	
	does not consider other factors affecting products	
	data can be inaccurate	
	AO2 Application	
	Context applied to an advantage (max 1 mark) and disadvantage (max 1 mark) of Boston matrix analysis, including:	
	 products a and d cash cows products b and c question marks 	
	no stars	
	limited portfolio of products	
	forecast market growth of 25% over the next 5 years	
	cash cows account for 55% of total revenue	
	AO3 Analysis	
	Limited analysis — candidate shows one link in the chain of analysis.	
	Developed analysis candidate shows two or more links in the chain of analysis or a two-sided analysis.	
	product development essential for competition and survival	
	can inform investment decisions	
	simple framework to use	
	only considers market share and market growth so won't be a complete analysis as to why products growing/declining help eliminate poorly performing products, saying money in the long run.	
	 help eliminate poorly performing products, saving money in the long run helps businesses understand current and future situations 	
	identify new opportunities to ensure future growth/success	
	need to consider extension strategies for products	
	although a product might contribute most to revenue what product will replace this if it declines?	

Question		Answer		Marks
2(c)	Accept all valid responses.			
	Exemplars and annotations			
	AO1 Knowledge	AO2 Application	AO3 Analysis	
	To enable business to move ? to stars .	Such as product C	Which is showing high market growth so CCL could consider ways to increase product C's market share	
	Simple analysis which does not take account of other factors	Such as Product B's forecast contribution to total revenue	Which is higher than either of the two cash cows so low market share may not need to be a concern	

Question				Answer		Marks
2(d)	Evaluate the importance of operations to CCL's added value.					12
	Level	AO1 Knowledge and understanding 2 marks	AO2 Application 2 marks	AO3 Analysis 2 marks	AO4 Evaluation 6 marks	
	3				 5–6 marks Developed evaluation in context A developed judgement/conclusion is made in the business context. Developed evaluative comments which balance some key arguments in the business context. 	
	2	2 marks Developed knowledge of relevant key term(s) and/or factor(s) is used to answer the question.	2 marks Developed application of relevant point(s) to the business context.	2 marks Developed analysis that identifies connections between causes, impacts and/or consequences.	 3–4 marks Developed evaluation A developed judgement/conclusion is made. Developed evaluative comments which balance some key arguments. 	
	1	1 mark Limited knowledge of relevant key term(s) and/or factor(s) is used to answer the question.	1 mark Limited application of relevant point(s) to the business context.	1 mark Limited analysis that identifies connections between causes, impacts and/or consequences.	 1–2 marks Limited evaluation A judgement/conclusion is made with limited supporting comment/evidence. An attempt is made to balance the arguments. 	
	0	0 marks No creditable response.	0 marks No creditable response.	0 marks No creditable response.	0 marks No creditable response.	

Question	Answer	Marks
2(d)	Indicative content	
	AO1 Knowledge and understanding	
	Knowledge of operations/added value (max 2 marks), including:	
	added value difference between price and costs	
	value added by the transformation process	
	produces outputs for customers	
	inputs used to create outputs	
	inputs are land, labour, capital and enterprise	
	outputs created in the manufacturing process	
	• AO2 Application	
	Context applied to CCL [47] (max 2 marks), including:	
	coffee a growing market	
	many (5) processes involved in the transformation process	
	product differentiation	
	products in different quadrants in the Boston matrix analysis	
	same ingredient in differently labelled jars	
	taste important in coffee consumption	
	may contribute more to non-branded product	
	AO3 Analysis	
	Limited analysis 🔤 – candidate shows one link in the chain of analysis.	
	Developed analysis - candidate shows two or more links in the chain of analysis.	
	 helps to build the brand – increasing revenue/sales/profit 	
	 can add product features that customers want – attract new customers/increase customer loyalty 	
	ensure quality – goods suitable for purpose	
	operate efficiently – cost effective	
	charge a higher price – increasing profits/value added	
	flexibility and innovation important – especially in a competitive/dynamic environment	
	protects market share and can increase it	
	proteste mantet share and san moreage it	

Question	Answer			Mark	
2(d)	AO4 Evaluation Limited evaluation — unsupported judgement and/or a weak attempt at evaluative comment Developed evaluation — supported judgement and/or reasonable evaluative comment Developed evaluation in context — supported judgement in context and/or reasonable evaluative comment in context. A judgement whether operations does contribute to added value. • evaluation of the relative importance of operations as compared to e.g. marketing • elements that the evaluation/judgement might depend upon: — don't know how efficient production is — other factors such as promotion may contribute more to added value — quality of the product important — design of packaging also contributes — convenience to customers important in creating added value — branding and product differentiation may be a greater contribution — difficult to measure contribution of operations Accept all valid responses.				
	Exemplars for awarding L1 [M] (limited supporting evidence)		L3 ^{EE} (developed supporting evidence with context)		
	Operations is very important to CCL's added value.	Operations is very important to CCL's added value as the quality of a product helps determine the price that can be charged.	Operations is very important to CCL's added value as the quality of a product helps determine the price that can be charged. Quality must be ensured at each many processes involved in the transformation of coffee beans to ground coffee.		
	Product differentiation may be more important than operations.	Product differentiation may be more important than operations as good marketing is required to sell the products.	Product differentiation may be more important than operations as good marketing is required to sell the products, in the case of CCL each different coffee product has the same ingredients.
